

BUSINESS ANALYST

Analytical professional combining quantitative research, financial risk assessment, and geospatial intelligence to support decisions in economic, marketing, and financial services environments. Experienced presenting complex statistical findings to government officials and executive stakeholders. MSBA candidate at Wake Forest University; eager to explore where data meets decision.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC
Master of Science in Business Analytics, May 2027

Wofford College, Spartanburg, SC | Honors: *Lesesne Scholar, Deans list (6 consecutive semesters)*
Bachelor of Science in Economics, January 2026

GPA: 3.78

AREAS OF EXPERTISE

Leadership | Economic Analysis | Business Management | Time Management | Collaboration | Data Visualization | Data-Driven Decision Making | Statistical Analysis | Quantitative Research | Financial Strategy | Team Building | Risk Strategy | Reporting | Qualitative Research | Big Data Technologies | Engaging Customer Service | Active Listening | Data Storytelling | Investing

TECHNICAL SKILLS

Programming Languages: Python (Intermediate), SQL, R
Analytical Software & Tools: R / RStudio, Python, SQL, Excel, Cognito Forms
Database Management: SQL (Data Set joining's/Tableau), R-based data pipeline management
Visualization & Reporting: Tableau, Power BI, ArcGIS (Geospatial Analysis), PowerPoint

PROFESSIONAL EXPERIENCE

PROJECT HEDGEHOG | Handshake AI | Remote
December 2025 – February 2026

- Evaluated and labeled synthetic media datasets to assess model accuracy in AI-generated image and video detection, applying structured quality standards to flag edge cases and anomalies.
- Developed prompt specifications and content guidelines to steer model outputs toward target performance criteria, supporting iterative model improvement cycles.

POWER UP PROGRAMMING INTERN | OneSpartanburg Inc. | Spartanburg, SC
May 2025 – August 2025

- Conducted financial and credit risk assessments on small business loan applicants, analyzing income statements, cash flow, and business viability to support lending decisions and capital allocation across the PowerUp program.
- Managed client data pipelines in R and Cognito Forms, cleaning and structuring applicant financial records to ensure data integrity for lending and resource allocation decisions.
- Served as primary liaison between borrowers, investors, and community funding pipelines; facilitated client onboarding, risk review, and connection to capital resources.

PRESIDENT | Sigma Nu Eta Omicron Chapter | Spartanburg, SC
November 2024 – November 2025

- Directed strategic operations for an 85+ member organization; managed a \$140k annual budget across vendor negotiations, dues collection, and academic and alumni programming.

COMMUNITY DATA ANALYST | Strategic Spartanburg | Spartanburg, SC
May 2024 – August 2025

- Performed quantitative analysis on food insecurity, upward mobility, and socioeconomic risk indicators using census and municipal datasets; delivered findings to local government officials and stakeholders to inform resource allocation policy.
- Developed interactive geospatial and statistical dashboards in R, Tableau, and ArcGIS, enabling community partners and government partners to monitor multi-indicator trends across census tracts.

HEAD RESIDENT ASSISTANT | Wofford College Residence Life | Spartanburg, SC
August 2024 – May 2025

- Promoted to Head RA after two years on-call; led professional development sessions and served as liaison between residence life administration and student leadership across the central area team.

ANALYTICAL EXPERIENCE

HONORS THESIS: EDUCATION-TO-EMPLOYMENT PIPELINE | RStudio, OLS Regression, IPEDS
January 2026

- Constructed a multi-stage regression framework using federal longitudinal labor data to analyze educational outcomes across four observational phases; validated model assumptions and tested for heteroskedasticity in RStudio.

FOOD INSECURITY & UPWARD MOBILITY DASHBOARDS | ArcGIS, Tableau, SQL, Excel
May 2025 – August 2025

- Built layered geospatial dashboards mapping food insecurity and poverty indicators across Spartanburg County census tracts using weighted census-to-municipal weightings; presented findings to county officials and stakeholders to provide insight into the seen issues in resource allocation policy.
